We keep storing more data

- Over a billion smartphones generating data
- All our data goes into the cloud
- We gather more statistics
- More CCTV systems are installed daily

How do we store all this data?
How do we store all this data?

- Do we use a proprietary system?
- Does that scale with us?
- Does that fit in our budget?
Use Ceph!

- Open source
- Fully distributed without any SPoF
- Scales with you into the Petabytes
- Runs on commodity hardware
- Hardware for the demos is provided by Dell

Meet Sage Weil; the brain behind Ceph
